

I do not support NAB's petition 04-160. I enjoy satellite radio because it brings variety and quality I can't find anywhere else. The traffic & weather reports I hear on XM are very different than those I hear on regular radio. I pay good money for satellite radio and I don't think it is the NAB's place to tell me what I can hear. I believe it would be fair to reject this petition so satellite radio listeners can continue to listen to high-quality programming and not feel cheated. Thank you for your time.
